### Normal People by Sally Rooney

*Connell and Marianne grew up in the same small town, but the similarities end there. At school, Connell is popular and well liked, while Marianne is a loner. But when the two strike up a conversation—awkward but electrifying—something life changing begins. A year later, they're both studying at Trinity College in Dublin. Marianne has found her feet in a new social world while Connell hangs at the sidelines, shy and uncertain. Throughout their years at university, Marianne and Connell circle one another, straying toward other people and possibilities but always magnetically, irresistibly drawn back together. And as she veers into self-destruction and he begins to search for meaning elsewhere, each must confront how far they are willing to go to save the other.*

Reading: The Umbrella Academy,  
Vol. 1 : Apocalypse Suite by Gerard Way

Come join us for this month's book discussion as a group

In an inexplicable worldwide event, forty-seven extraordinary children were spontaneously born by women who had previously shown no signs of pregnancy. Millionaire inventor Reginald Hargreeves adopted seven of the children; when asked why, his only explanation was, 'To save the world.' These seven children form The Umbrella Academy, a dysfunctional family of superheroes with bizarre powers. Their first adventure at the age of ten pits them against an erratic and deadly Eiffel Tower, piloted by the fearsome zombie-robot Gustave Eiffel. Nearly a decade later, the team disbands, but when Hargreeves unexpectedly dies, these disgruntled siblings reunite just in time to save the world once again.
